### *Overall Quality level of the Institution*

This Student Satisfaction Survey for the outgoing B.Ed and M.Ed aims to find out the scholastic and co-scholastic levels and the feedback and opinions. This survey consists of four major components;

Teaching, Learning and Evaluation,

Learning Environment,

Facilities in the Institution and

General information regarding the functioning of the institution.

## **Findings, Conclusions and ATR**

Regarding Teaching Learning and Evaluation with respect to the Academic Level of the College, Quality of Learning and Evaluation Activities, Quality and Proficiency of Teachers, Efficacy of the Programme, Academic Advising and Research Mentoring, Accessibility of Teaching faculty, Academic collaboration among Students, Education for Future Life, and Importance for Value based Education, the students had given high preferences/scores to the institution and its activities. In all the components the majority preference is Excellent or Good.

It shows the students are highly satisfied with the teaching-learning and evaluation process offered in this institution. In general, the institution gives more importance to the

quality of teachers, teaching-learning process, evaluation, research orientation, etc. The aspects considered such as, Learning Environment, Facilities of the Institution and General Observation on the activities/programmes/ quality concerns of the institution, the students gave good feedback. But the component like organisation of the activities of various clubs, canteen facilities, the students gave low score. The institution considered this as a serious matter and changes including more items in the canteen, more seating arrangements, canteen time, etc are positively changed as per the request of the students and the students' union. If possible, the institution plans to construct a new provision for the canteen. Also the institution is planning to conduct and organise all the club related activities next academic year onwards.
