THEORETICAL BASES OF TEACHING

(PAPER IV)

Chapters	Pages
I. SCIENCE: CORRELATION WITH OTHER SUBJECTS	
A. SCIENCE	19-27
i) Definition of Science	19
ii) The Nature of Science	20
ii) Science as a Process	24
iii) Science as a Product	25
iv) Interdependency of Science both as a Process and Product	25
v) Science and Technology	25
vi) Scientific Literacy	26
B. CORRELATION	27-32
i) The Concept of Correlation	27
ii) Incidental Correlation	28
iii) Systematic Correlation	29
iv) Correlation of Science within the Subject	29
v) Correlation of Science with other School Subject	30
1. Correlation of Science and Mathematics	30
2. Correlation of Science and Biology	30
3. Correlation of Science and Language	30
4. Correlation of Science and Geography	31
5. Correlation of Science and History	31
6. Correlation of Science and Earth Science	31
7. Correlation of Science and Drawing	31
8. Correlation of Science with Music and Craft	32
vi) Correlation of Science with Life and Environment	32
vii) Advantages of Correlation	32
2. CURRICULUM DEVELOPMENT	
A. CONCEPT OF CURRICULUM DEVELOPMENT	33-38
i) Definition of Curriculum	33
ii) Curriculum and Instruction	34

iii) Some Curricular Models and Philosophies	34
iv) General Principles of Curriculum Construction	36
v) Curriculum and Psychological Needs	37
vi) Curriculum and Sociological Needs	37
vii) Curriculum and Philosophical Needs	38
viii) Nature of Subject Matter	38
B. APPROACHES IN CURRICULUM ORGANISATION	38-48
i) Movement Down Along a Road	38
ii) The Swing of a Pendulum	39
iii) Spiral Approach	39
iv) Concentric Plan	39
v) Type Study	40
vi) Historical Approach	41
vii) Nature Study	41
viii) Nature Rambling	44
ix) Topic Plan	44
x) Defects of Existing Curriculum	45
xi) Activity Based Curriculum	45
xii) Organisation of the Curriculum	46
xiii) Principles for Science Curriculum	48
C. VARIOUS CURRICULUM PROJECTS	49-54
i) Nuffield Science Teaching Project	49
ii) Biological Sciences Curriculum Study	50
iii) Chemical Education Material Study	52
iv) Chemical Bond Approach	53
v) The Physical Science Study Committee	53
D. TYPES OF CURRICULUM	54-55
i) Enriched Curriculum	54
ii) Hidden Curriculum	54
iii) Conceptual and Factual Approach	55
iv) Integrated Curriculum	55
v) Core Curriculum	55
vi) Disciplinary Approach	55
vii) Different Types of Curriculum	55

3. AIMS AND OBJECTIVES OF TEACHING SCIENCE

A. GENERAL AIMS AND OBJECTIVES OF TEACHING SCIENCE	56-61
i) Aim	56
ii) General Aims of Teaching Science	57
iii) Criteria for the Selection of Aims	57
iv) Functions of Science	58

a. Practical Function	59
b. Disciplinary Function	60
c. Recreational Function	60
d. Other Functions of Science	61
B. TAXONOMY OF EDUCATIONAL OBJECTIVES	62-86
i) Bloom's Taxonomy of Educational Objectives	62
ii) Objective Based Instruction	62
iii) Instructional Objectives	64
iv) How to State Instructional Objectives?	65
v) Expected Behavioural Change	66
vi) Cognitive Domain	66
vii) Affective Domain	69
viii) Psychomotor Domain	69
ix) Instructional Objectives and Specifications	71
x) Scientific Attitude	74
xi) Techniques for Developing Scientific Attitudes	74
xii) Definitions of Scientific Aptitude	78
xiii) Taxonomy of Science Education	79
xiv) Process Skills	81
xv) Multiple Intelligence	83

4. METHODS OF TEACHING SCIENCE

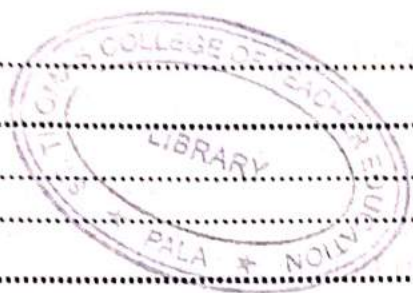

A. MODELS OF TEACHING	87-109
i) Introduction	87
ii) Basic Elements of Families	89
iii) Information Processing Family	90
1. Concept Attainment Model	90
2. Inquiry Training Model	98
3. Advance Organizer Model	104
4. Inductive Thinking Model	107
B. INSTRUCTIONAL STRATEGIES	109-129
i) Lecture Method	111
ii) Demonstration Method	114
iii) Lecture-cum-Demonstration Method	116
iv) Heuristic Method	116
v) Project Method	118
vi) Problem Solving Method	122
vii) Co-operative Learning	123
viii) Seminar	126
ix) Simulation	127
x) Role-play	127
xi) Discussion Method	128

a. Practical Function	59
b. Disciplinary Function	60
c. Recreational Function	60
d. Other Functions of Science	61
B. TAXONOMY OF EDUCATIONAL OBJECTIVES	62-86
i) Bloom's Taxonomy of Educational Objectives	62
ii) Objective Based Instruction	62
iii) Instructional Objectives	64
iv) How to State Instructional Objectives?	65
v) Expected Behavioural Change	66
vi) Cognitive Domain	66
vii) Affective Domain	69
viii) Psychomotor Domain	69
ix) Instructional Objectives and Specifications	71
x) Scientific Attitude	74
xi) Techniques for Developing Scientific Attitudes	74
xii) Definitions of Scientific Aptitude	78
xiii) Taxonomy of Science Education	79
xiv) Process Skills	81
xv) Multiple Intelligence	83

4. METHODS OF TEACHING SCIENCE

A. MODELS OF TEACHING	87-109
i) Introduction	87
ii) Basic Elements of Families	89
iii) Information Processing Family	90
1. Concept Attainment Model	90
2. Inquiry Training Model	98
3. Advance Organizer Model	104
4. Inductive Thinking Model	107
B. INSTRUCTIONAL STRATEGIES	109-129
i) Lecture Method	111
ii) Demonstration Method	114
iii) Lecture-cum-Demonstration Method	116
iv) Heuristic Method	116
v) Project Method	118
vi) Problem Solving Method	122
vii) Co-operative Learning	123
viii) Seminar	126
ix) Simulation	127
x) Role-play	127
xi) Discussion Method	128

	11
xii) Debate	129
C. SMALL GROUP TECHNIQUES	129-132
i) Buzz Session	129
ii) Brainstorming	130
D. INDIVIDUALISED METHODS	132-142
i) Programmed Learning	132
ii) Linear Programming	135
iii) Branched Programming	136
iv) Individualized Laboratory Method	137
v) Supervised Study	139
vi) Dalton Plan	140
E. DIFFERENTIAL TEACHING	142

5. SCIENTIFIC METHOD

A. PROCESS OF SCIENTIFIC METHOD	144-159
i) The Five Steps of Scientific Method	144
ii) Characteristics of Scientific Method	145
iii) Elements of Scientific Method	146
iv) Hypotheses	151
v) Research	153
vi) Action Research	154
vii) Drawing of Inference	157
viii) Generalization	157
ix) Transfer Value of Scientific Method	158
B. TECHNICAL ASPECT OF SCIENTIFIC METHOD	159-166
i) Collection of Data	159
ii) Observation	160
iii) Artificial Observation or Experimentation	160
iv) Concept of Sampling	161
v) Variables	163
vi) Recording and Reporting of Data	165
vii) General Format of the Research Report	165

6. RESOURCE MATERIALS IN THE TEACHING OF SCIENCE

A. PRINCIPLES FOR FRAMING A SYLLABUS IN SCIENCE	167-168
Critical Review of the Present Standard Syllabus in our Schools	168
B. TEXT BOOK	169-176
i) Characteristics of a Good Text Book	169

ii) Use of the Textbooks	170
iii) Vogel's Criteria of Selection	171
iv) Resource Unit	174
v) Workbook for Pupils	174
vi) Teacher's Handbook	175
vii) Reference Books	175
viii) Supplementary Readers	176

C. AUDIO VISUAL AIDS 176-205

i) Essential Audio-visual Aids	176
ii) Cone of Experience	180
iii) Projected Aids	180
iv) Non projected Aids	183
v) Three Dimensional Aids	187
vi) CD - ROM	192
vii) Encarta	192
viii) ERIC	194
ix) Encyclopedia Britannica	195
x) Improvised Aids	195
xi) Video Lessons Such as World of Chemistry	196
xii) Multimedia	196
xiii) Internet	197
xiv) The World Wide Web	199
xv) E - learning	199
xvi) Information Communication Technology	201
xvii) INFLIBNET	201
xviii) Teleconferencing	203
xix) EDUSAT	204
xx) Blue Tooth	205

D. LABORATORY AND ITS ORGANISATION 205-212

i) Importance of Laboratory work	205
ii) Selection and Purchase of Apparatus, Chemicals and Equipments	206
iii) Maintenance of Laboratory Workshop	207
iv) Laboratory Rules	208
v) Accidents in the Laboratory and First Aid	209
vi) Precautions While Doing Laboratory Practicals	210
vii) Registers in the Laboratory	210
viii) Suggestions to Develop Infrastructure of a Laboratory	212

E. SCIENCE LIBRARY AND ITS ORGANIZATION 212-215

i) Place of Science Library in a Modern School	212
ii) Organisation	213
iii) Furnishing a Science Library	215
iv) Selecting and Procuring Science Reading Materials	215

7. LEARNING AS A GENERATIVE PROCESS, ASSESSMENT, NTSE

A. LEARNING AS A GENERATIVE PROCESS	216-223
i) Children's Science	216
ii) Learner as a Scientist	216
iii) Pre-conceptions and Mis-conceptions of the Learner	217
iv) Behaviourist Approach	217
v) Constructivist Approach	218
vi) Important Ideas of Constructivism	220
vii) Collaborative learning	221
viii) Constructivist Enquiry Learning Model for Science Education	222
ix) Ways to know Children's Ideas	223
B. ASSESSMENT OF SKILLS AND INTERESTS IN SCIENCE	225-230
i) Skill	226
ii) Interest	226
1. Strong Vocational Interest Blank (SVIB)	227
2. Kuder Interest Inventory	227
iii) Diagnostic Test	227
iv) Remedial Teaching	229
C. NATIONAL TALENT SEARCH EXAMINATION	230-232
i) Scope of the Scheme	231
ii) Scheme of Testing	231
iii) Rate of Scholarship	232

8. CO-CURRICULAR ACTIVITIES

A. FIELD TRIPS	233-235
Advantages	234
Study Tours	235
B. SCIENCE CLUB	235-237
i) Organizing a Science Club	235
ii) Activities of a Science Club	237
C. SCIENCE EXHIBITION AND SCIENCE FAIR	237-239
i) Purposes of a Science Fair	237
ii) Values of a Science Fair	237
iii) Organizing a Science Fair	238
iv) Factors in Planning a Science Fair	239
v) Science Fair - Evaluation Sheet	239
D. SCIENCE MUSEUM	240-241
i) Functions of Science Museum	240
ii) Procedure of Setting up a Science Museum	240
iii) Advantage of Science Museum	241

E. AQUARIUM	241-242
i) Preparation of an Aquarium	241
ii) Advantages of an Aquarium	242
F. VIVARIUM	242
G. TERRARIUM	242
i) Types of Terrarium	242
ii) Uses of Terrarium	242

9. TEACHER AND PROFESSIONAL GROWTH

A. TEACHER	243-248
i) Essential Qualities of a Teacher	243
ii) Qualities and Competencies of a Science Teacher	244
iii) Duties and Responsibilities of a Science Teacher	245
iv) Different Roles of the Teacher	245
B. PROFESSIONAL GROWTH - INSERVICE TRAINING	248-251
i) Pre-service Education	249
ii) In-service Education	249
iii) Roles of S.C.E.R.T & N.C.E.R.T	251
iv) Science Teacher's Diary	251

10. INSTRUCTIONAL SKILLS

A. TEACHING SKILLS FOR CLASSROOM INSTRUCTION	252-271
i) Microteaching Technique Setting	252
ii) Link Practice	253
iii) Microteaching	253
iv) Mechanics to Microteaching	255
v) Core Teaching Skills	256
1. Skills of Introducing a Lesson	257
2. Skills of Blackboard Writing	258
3. Skills of Questioning (Fluency)	260
4. Skills of Stimulus Variation	262
5. Skills of Explaining	263
6. Skills of Demonstration	264
7. Skills of Probing Questioning	266
8. Skills of Illustrating with Examples	267
9. Skills of Reinforcement	269
10. Skills of Promoting Pupil Participation	270

11. TEAM TEACHING

i) Definition of Team teaching	272
--------------------------------------	-----

	15
ii) Styles of Team teaching	272
iii) Instruction Values of Team Teaching	273
A. LATERAL THINKING	274-275
i) Lateral Thinking Techniques	275
ii) Applications of Lateral Thinking	275
B. EXPOSITORY TEACHING	276
C. INQUIRY LEARNING	276

12. SCIENCE KITS

i) Design of Kits	277
ii) Type of Kits	277
iii) Advantages of Science Kits	277
A. SCIENCE - ARISTOTLE'S ELEMENTS	278-280
i) Arabs and Alchemy	279
ii) Phlogiston Theory	279
iii) History of Science	279
iv) Science in Ancient India	279
B. EXPLOSION OF KNOWLEDGE	280
C. INDIAN SPACE PROGRAMMES	280-282
i) Effect of Space Exploration in Science Education	282
ii) Sputnik	282
iii) Chandrayan -2	282

13. CREATIVITY IN SCIENCE TEACHING

i) Definition of Creativity	283
ii) Towards a Creative classroom	283
iii) Characteristics of Gifted Students in Science	285
iv) Educational Provisions for Gifted Children	285
v) Task Persistence	286
vi) Magnet Schools	287

14. BASIC THEORIES FOR LEARNING SCIENCE

A. JEAN PIAGET: COGNITIVE THEORY	288
B. JEROME S. BRUNER: DISCOVERY LEARNING	289
C. ROBERT M. GAGNE: EVENTS OF INSTRUCTION	289
D. LEV VYGOTSKY: ZONE OF PROXIMAL DEVELOPMENT	290
E. REFLECTION: A BASIC PROCESS FROM EXPERIENCE	291-292
i) Definition of Reflection	291
ii) Strategies for Promoting Reflection.	291

ii) Styles of Team teaching	272
iii) Instruction Values of Team Teaching	273
A. LATERAL THINKING	274-275
i) Lateral Thinking Techniques	275
ii) Applications of Lateral Thinking	275
B. EXPOSITORY TEACHING	276
C. INQUIRY LEARNING	276

12. SCIENCE KITS

i) Design of Kits	277
ii) Type of Kits	277
iii) Advantages of Science Kits	277
A. SCIENCE - ARISTOTLE'S ELEMENTS	278-280
i) Arabs and Alchemy	279
ii) Phlogiston Theory	279
iii) History of Science	279
iv) Science in Ancient India	279
B. EXPLOSION OF KNOWLEDGE	280
C. INDIAN SPACE PROGRAMMES	280-282
i) Effect of Space Exploration in Science Education	282
ii) Sputnik	282
iii) Chandrayan -2	282

13. CREATIVITY IN SCIENCE TEACHING

i) Definition of Creativity	283
ii) Towards a Creative classroom	283
iii) Characteristics of Gifted Students in Science	285
iv) Educational Provisions for Gifted Children	285
v) Task Persistence	286
vi) Magnet Schools	287

14. BASIC THEORIES FOR LEARNING SCIENCE

A. JEAN PIAGET: COGNITIVE THEORY	288
B. JEROME S. BRUNER: DISCOVERY LEARNING	289
C. ROBERT M. GAGNE: EVENTS OF INSTRUCTION	289
D. LEV VYGOTSKY: ZONE OF PROXIMAL DEVELOPMENT	290
E. REFLECTION: A BASIC PROCESS FROM EXPERIENCE	291-292
i) Definition of Reflection	291
ii) Strategies for Promoting Reflection.	291

PART II
PEDAGOGIC ANALYSIS OF SCIENCE
(PAPER V)

1. PLANNING OF INSTRUCTION

1. PLANNING OF INSTRUCTION	295-304
A. PLANNING	295
i) Year Plan	296
ii) Unit Plan	299
iii) Lesson Plan	299
iv) Objective Based Instruction	302
v) Measurement	302
vi) Evaluation	302
B. LESSON PLANNING	305-321
i) Herbatian Steps in Lesson Planning	305
ii) Lesson Plan on Biology	307
iii) Lesson Plan on Physics	312
iv) Lesson plan on Biology Based on Constructivist Format	314
v) Lesson Plan on Chemistry Based on Constructivist Format	318

2. EVALUATION

A. EDUCATIONAL EVALUATION	322-341
i) Purpose of Evaluation	322
ii) Principles of Evaluation	322
iii) Kinds of Evaluation	323
iv) Achievement Test	325
v) Different Types of Test and Test Items: Merits and Demerits	334
vi) Essay Type Question	334
vii) Short Answer Question	336
viii) Objective Type Question	337
B. CONCEPT OF CONTINUOUS AND COMPREHENSIVE EVALUATION (CCE)	342-355
i) Characteristics of CCE	342
ii) Question Bank	344
iii) Semester System	345
iv) Grading	345
v) Components of Evaluation	347
vi) Characteristics of a Good tool	351
A. Reliability	351
B. Validity	353

C. Usability	354
i) Analyzing the Test	355

3. FAMOUS SCIENTISTS AND THEIR CONTRIBUTIONS..... 357-363

i) Galeleo	357
ii) Newton	357
iii) Lavosier	358
iv) Boyle	358
v) Mendeleev	358
vi) Faraday	359
vii) Max Planck	359
viii) Einstein	359
ix) C.V. Raman	359
x) P.C. Ray	360
xi) Bhabha	360
xii) Meg Nad Saha	360
xiii) Subrahmanyam Chandrasekhar	361
xiv) Sivaramakrishna Chandrasekhar	362
xv) A.P.J. Abdul Kalam	362
xvi) Vikram Sarabhai	363
xvii) E.C. George Sudarshan	363

4. INNOVATIONS IN LEARNING 364-369

i) Brain Based Learning	364
ii) Mobile Learning	365
iii) Project Based Learning	367
iv) Service Learning	368
v) Resource Based Learning	368
vi) Problem Based Learning	369
vii) Work Based Learning	369

5. DAYS OF IMPORTANCE 370

6. IMPACT OF TEACHING NATURAL SCIENCE IN PROMOTING NATIONAL GOALS OF EDUCATION 371-374

7. NATIONAL CURRICULUM FRAME WORK..... 375-383

APPENDIX	384
REFERENCES	386
NAME INDEX	390
SUBJECT INDEX	392
