Abstract

Education helps every person to acquire knowledge, skills and attitudes required to lead an efficient life. Education and employment helps a lot to improve the status of women. Education helps men and women claim their rights and realize their potential in economic, political and social arenas and develops the decision making capacity. Awareness on Legal Provisions for Safety of Women provides with the ability to make social and family changes and to increase their control of their own lives and decision that affect them. This makes girls to understand the significance of equality, liberty, fraternity and also exploitation if any. This study was conducted on a representative sample of 360 Adolescent Girls from aided, unaided and Government Schools belong to both Urban and Rural area in Kottayam district. The Inventory on the Awareness on Legal Provisions for Safety of Women and Decision Making Capacity Scale prepared by the investigator was used for data collection. The results shows that there is a positive relationship between awareness on Legal Provisions for Safety of Women and the decision making capacity of adolescent girls.

Abstract
 Education today is a paid service which has serious and negative effect on our society. The unit cost aspect of school education and higher education in Kerala has so far remained a neglected area. The study aims to review the recent changes in the cost of education, to analyze the general awareness about free and compulsory primary education and to suggest measures to reduce the trend of commercialization in education. The respondents also highlighted some of the issues and drawbacks of public and private education systems. There are remarkable differences in the cost of education between the public and private education sectors. Issues like fee control should be attended very carefully both in public and private educational institutions under the strict supervision of the government.

Abstract

Education helps every person to acquire knowledge, skills and attitudes required to lead an efficient life. Education and employment helps a lot to improve the status of women. Education helps men and women claim their rights and realize their potential in economic, political and social arenas and develops the decision making capacity. Awareness on Legal Provisions for Safety of Women provides with the ability to make social and family changes and to increase their control of their own lives and decision that affect them. This makes girls to understand the significance of equality, liberty, fraternity and also exploitation if any. This study was conducted on a representative sample of 360 Adolescent Girls from aided, unaided and Government Schools belong to both Urban and Rural area in Kottayam district. The Inventory on the Awareness on Legal Provisions for Safety of Women and Decision Making Capacity Scale prepared by the Investigator was used for data collection. The results shows that there is a positive relationship between awareness on Legal Provisions for Safety of Women and the decision making capacity of adolescent girls.

Abstract

Education today is a paid service which has serious and negative effect on our society. The unit cost aspect of school education and higher education in Kerala has so far remained a neglected area. The study aims to review the recent changes in the cost of education, to analyze the general awareness about free and compulsory primary education and to suggest measures to reduce the trend of commercialization in education. The respondents also highlighted some of the issues and drawbacks of public and private education systems. There are remarkable differences in the cost of education between the public and private education sectors. Issues like fee control should be attended very carefully both in public and private educational institutions under the strict supervision of the government.
